# DMR & DMR HD Options

Studio Package

• For DMR with Studio package, simultaneous input of up to 2 video sources combined to 1 multi-image recording

• For DMR HD with Studio package, simultaneous input of up to 3 video sources combined to 1 multi-image recording

Keycard Automation System

This revolutionary patented system completely automates the workflow of capturing, streaming, and distributing control based on a user I.D. The Keycards allow a level of ease of use in streaming applications never seen before in the industry. *MediaPOINTE offers the only HIIPA Compliant solution available – More information available upon request

Open Mic Talkback Option

Open Mic adds the ability for 2-way audio conferencing over a live stream with unlimited users. During the session the audience members will be able to ask questions in real-time and the presenter will be able to respond.

Video-On-Demand

VOD Software Option enables the DMR & DMR HD to :

• Browse/play recorded content from DMR & DMR HD

• Browse/play live streams from DMR & DMR HD

• Make recorded content available to DMR & DMR HD (enabled with VOD option) & DVP

• Stream live content to DMR , DMR HD & DVP

AESOP Storage Devices

Adds one or three terabytes of content storage without compromising space on the network. User access is controlled by the same web interface as the DMRs, so there is no need for additional network supervision. Available as 1-terabyte external storage or 3-terabyte option.
