Introducing ... The world's most advanced tactical communications solution. Host multi-point video calls. Encrypt, transmit, and record video and data from internal or remote sensors. Setup networks with multiple classification levels. Pop-up wireless network for perimeter operations.

## FEATURE HIGHLIGHTS

... With or Without a Physical Network Connection!

- High brightness, optically bonded screens for flawless, outdoor daylight operations
- Auto-failover to WiFi or 4G/5G upon loss or unavailability of SATCOM or wired network
- Beamforming mic array and specially tuned speakers provide superior pickup range
- Up to 3 10 port 1/10GB switches to manage multiple security level networks at once
- Supports multiple VTC platforms including MS Teams, Webex, Zoom, and Google Meet
- Use the TAC-CR as a wireless network hub for perimeter operations in the field
- Built-In PC for managing sensors, switches, encryption, and running all user applications
- Supports up to 3 external displays and 2 outboard cameras for large venue integration
- Share content on mobile devices wirelessly with local and remote users
- Military spec, ruggedized, waterproof, dust proof case with EMI/RFI shielding
