TACTICAL VIDEO COMMAND CENTER

HD Video, Data Acquisition, Streaming, Conferencing & Recording

Media POINTE®
TAC-CR3

Introducing the world's most advanced tactical visual communications solution. Host live multipoint video conferences. Livestream video feeds from internal or remote sensors. Pop up a wireless network for perimeter operations[1]. Record, encrypt, and transmit video & data. Wireless, 4k, Encrypted, and Secure ...

... **With** or **Without** a **Network Connection** or **Power!**[1]

FEATURE HIGHLIGHTS

- High brightness, optically bonded screens for flawless, outdoor daylight operations

- Auto-failover to WiFi, cellular or UPS upon loss or unavailability of network or power[1]

- Beamforming mic array and specially tuned speakers provide superior range for groups

- Zoom In on whiteboards, objects, etc. with the push of a button on the wireless remote

- Built on latest Cisco Collaboration Endpoint software and Cisco Codec Pro platform

- Use the TAC-CR3 as a wireless network hub for perimeter operations in the field[1]

- Track or monitor command operations with onboard GPS mapping[1]

- Supports up to 3 external displays and 2 outboard cameras for large venue integration

- Share content on mobile devices wirelessly with local and remote users

- Military spec, ruggedized, waterproof, dust proof case with EMI/RFI shielding
