

# Portable Wireless Video Recording & Streaming

TAC HD

KAS - Keycard Automation System\*

The MediaPOINTE TAC HD is the world's first portable **WIRELESS** all-in-one video recording and streaming system. Just plug in the power cord and you're ready to record and stream any meeting, lecture or live event in minutes. It's so easy to use... Anyone can create professional videos of events.

## capabilities

Wireless microphone & camera systems allow for connection free operation

Control the TAC HD & watch videos live, on-demand or download...All Wirelessly

Combine up to two video, one audio and one hi-res source (i.e. PC, HD Camera, etc.) into a single multimedia image

Buffered outputs for hi-res sources will power a projector or flat panel display

Wireless camera, tripod, mics, cables & other accessories are all self-contained in the handheld hard shell carrying case

KAS (Keycard Automation System) automates everything from generating metadata to copying, uploading and converting video files to other formats
